PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEER (Full Stack Software Developer)

January 2022 – April 2025

Newfold Digital, India (Full Time)

At Newfold Digital, I was a core developer responsible for the New Customer Onboarding Software Project.

- Built a state-of-the-art, open-source Modern Onboarding system for new customers using PHP and React, integrated with OpenAI APIs, reducing onboarding time by 30% and serving 1000+ users daily.
- Created an AI-driven onboarding experience that enabled customers to generate complex, custom-tailored websites from basic prompts using microservices in Cloudflare and Laravel.
- Developed scalable task systems & cron jobs for automated plugin installation, optimising performance & reliability in backend as well as frontend with service-oriented architecture.
- Optimised code for efficiency and prevented major incidents by identifying bugs through code reviews and regular code cleanup with performance optimisation. Also, did regular Unit testing/integration testing in code.
- Optimised React performance using memoisation and caching, reducing render time and improving onboarding responsiveness and workflows as a Frontend Developer.
- Applied advanced coding practices, RESTful APIs and used HashMaps and caches to ensure smooth backend functionality of the product.
- One of the top contributors to the team's codebase. I also gave regular presentations and demos to senior management, highlighting the main features of the product.

LEAD DEVELOPER INTERN

December 2020 – January 2021

TecideXa Services, India

- Designed, developed, and tested client-facing apps using Flutter, ensuring high-quality delivery.

APP DEVELOPER - FREELANCE

August 2020 – November 2020

Gilitz, India

- Translated designs into production-ready apps, followed by rigorous testing & deployment.

EDUCATION

MASTER OF SCIENCE IN COMPUTER SCIENCE (MSc. INFORMATIK)

Expected graduation: May 2027

Karlsruher Institut für Technologie, Karlsruhe, Germany

- Specialisation in **Human Centred Machine Intelligence**
 - Artificial Intelligence and IT Security
- Specialisation in **Telematics**
 - Internet of Everything

BACHELOR OF ENGINEERING IN COMPUTER SCIENCE

Graduated: August 2022

BMS Institute of Technology and Management, Bengaluru, India

- GRADE: 8.94 (German GPA: 1.6; 1.0 - Best, 4.0 - Bad)
- Published a research paper in IJITEE in February 2020 on a Smart Farming IoT-based system.

SCHOOL

GENERAL HIGHER EDUCATION

Graduated: August 2018

St. Michael's Sr. Sec School, New Delhi, India

- GRADE: 87% (German GPA: 1.58, 1-Best 4-Bad)
- App Development, Web Development
- Part of the School Cabinet as the Discipline Head of the entire school with 3000+ students.

AWARDS & VOLUNTEER EXPERIENCE

Edward De Bono Award for Creativity & Innovation

Newfold Digital, Mumbai, India

Android Programming National FDP

Conducted a national-level Android programming workshop.

Machine Learning Open Course

Conducted a Machine Learning Open Course for beginners.

CERTIFICATIONS

1. **Android App Development Specialisation Course** - Vanderbilt University, US (2020)
2. **C++ For C Programmers** - University of California, US (2020)
3. **Build Your First Android App (Project-Centred Course)** - CentraleSupélec (2020)
4. **Advanced PHP** - LinkedIn Learning
5. **Neural Networks and Deep Learning** – deeplearning.ai
6. **Structuring Machine Learning Projects** – deeplearning.ai

PROJECTS

Smart Farming IoT | IJITEE Research Paper | February 2020

Automating Mouse Movements | ResearchGate Paper | October 2020

CORONAI | HackAthon | November 2020

Flutter Loading Kit | Pub.dev | May 2021

LANGUAGES

English - Fluent (IELTS C1)

German - Intermediate (Current Level: A2, Studying: B1)

TECH SKILLS

Languages: JavaScript, TypeScript, Python, SQL, PHP, Java, C, C++, Dart

Frameworks: React, Node.js, Express, Django, Flask, Flutter, REST APIs, Cypress

Cloud & Deployment: Cloudflare, CDN, Caching

Design & Productivity: Figma, JIRA, Confluence, Agile, Scrum

DevOps & Tools: Git, GitHub, GitHub Actions, CI/CD, Docker, Linux Scripting, Postman, NPM, Yarn, Unit testing, Integration testing
